France is the 8th agricultural power in terms of contribution to the production value and the share of the working population employed in agriculture. France is also a global leader in exports of wheat, seeds, alcohols, wines, and spirits.

### INTERNATIONAL
Europe is the world’s leading agricultural power in terms of production value and the share of the working population employed in agriculture.

French agricultural production is valued at €76 billion, far ahead of Germany (56 billion), Italy (49 billion), and Spain (43 billion). France is also a global leader in exports of wheat, seeds, alcohols, wines, and spirits.

### AGRICULTURE AGRONOMY

France is the European Union’s largest agricultural producer, followed by Germany, Italy, and Spain. With over 500,000 farms, agriculture accounts for more than 1 million jobs in France. Most of these are in the sectors of cereal production and dairy farming, but also in market gardening, viticulture, arboriculture, and horticulture. The arable crop sector is composed primarily of cereals (wheat, barley, corn, etc.), oilseeds (sunflower, colza, soy, etc.), and protein crops (peas, beans, etc.).

The census of agriculture reveals the richness and diversity of French agriculture: cereals, fruits, garden farming, wines, livestock, etc. With regard to medium and large farms, 30% specialize in cattle, 23% in arable crops, and 15% in viticulture. Organic farming is also growing in France with more farmers involved in on-farm processing and short food supply chains.

Thousands of jobs will need to be filled in agriculture, agribusiness, and forestry. From trees to wood products, the wood-forest sector includes diverse fields such as silviculture, logging, wood furniture, construction, sawing, woodwork, and the paper and cardboard industry.

Programs in agriculture are broken down into 8 subject areas: production, processing, spatial planning and environmental protection, equipment, marketing and sales, services, equestrian activities, and animal husbandry and care.

BREVET DE TECHNICIEN SUPÉRIEUR AGRICOLE
(BTSA, AGRICULTURAL TECHNICIAN CERTIFICATE)
(SECONDARY DIPLOMA + 2 YEARS OF HIGHER EDUCATION) – L2

The BTSA is offered in private and public secondary schools. 16 BTSA concentrations (options) are available:

- Production agronomic; crop production; analysis, management, and strategy of farm businesses; aquaculture; agricultural development in hot regions; animal production; horticultural production; viticulture; enology
- Agro-machinery: agricultural machinery technician training
- Processing of agricultural products: agricultural, biological, and biotechnological analyses; food sciences and technologies
- Agribusiness and agri-supply: technical/commercial training
- Services and consulting: rural development and planning
- Planning: landscaping; forest management; nature management and protection; water management.

The Brevet de Technicien Superieur Maritime (BTSM, maritime technician certificate) in fisheries and marine environment management is offered by the Lycee Professionnel Maritime Paul Bousquet in Sète and Boulogne-sur-mer.

> Formation> Bac+3 & 4

PROFESSIONAL LICENCES
(SECONDARY DIPLOMA + 3 YEARS OF HIGHER EDUCATION) – L2 + 1

Three academic programs are available in agriculture:

- Law, economics, management (distribution, agribusiness), commerce (consulting for members of livestock cooperatives, marketing and international export of French wines), and agribusiness law;
- Social sciences and humanities in agronomy (sustainable agriculture and environmental certification), landscaping (parks, gardens, green areas, sports fields), and land planning (development and management of natural areas);
- Sciences, technologies, health in agronomy (organic agriculture, sustainable resource management), animal products (consulting jobs in livestock, technical-commercial jobs in animal nutrition), crop production (crop protection techniques and plant technologies), maintenance of agro-machinery, biotechnologies.

BACHELOR OF SCIENCES
(SECONDARY DIPLOMA + 2 YEARS OF HIGHER EDUCATION) – L3

The Bachelor of Sciences European Engineer Degree “Animal Products, Crop Products, International Agribusiness” is offered in English by the École Supérieure d’Agriculture d’Angers in partnership with the Université Agricole de Dronthe (Netherlands).

> Formation>Bac+3 & 4

MASTER
(SECONDARY DIPLOMA + 5 YEARS OF HIGHER EDUCATION) – M2

Several academic programs offer a Master with concentrations (mentions et spécialités) in the environment:

- Sciences of the environment, land, and the economy with the following concentrations: planning, energy and land ecology, risk governance, sustainable construction, green construction, ecosystems, marine environment, tourism, arctic studies, health, functional ecology, ecological modeling, environmental toxicology, sciences of industrial and urban environments, etc.
- Life and environmental sciences and technologies: risks of biocontaminants in human and animal food, engineering of products and processes, technology and health and biodiversity, continental environments and hydrosciences, tropical ecosystems management.
- Sciences, technologies, health: industrial environment, environmental engineering, ecology, sustainable development, risks, expertise, health/safety, naval environment, etc.
- Law, economics and management with the following concentrations: chemical pollutants, geological engineering, heritage, management, quality, safety, energy, construction, sustainable development.
- Humanities and social sciences: environmental projects, geomatics, sustainable development, social responsibility, archeology and environment, paleoenvironment, Mediterranean and African environments, etc.

NIVEAU POST-M

MASTÈRE SPÉCIALISÉ (MS, SPECIALIZED MASTER)
(M2 + 1 YEAR OF HIGHER EDUCATION)

Labeled by the Conférence des Grandes Écoles, the Mastère Spécialisé program enables students to earn an institutional credential attesting to dual competence in specialized areas of Environmental studies (French and/or English).
